

B. Solar Radio Emission
 B1.Outstanding Occurrences at Hiraiso

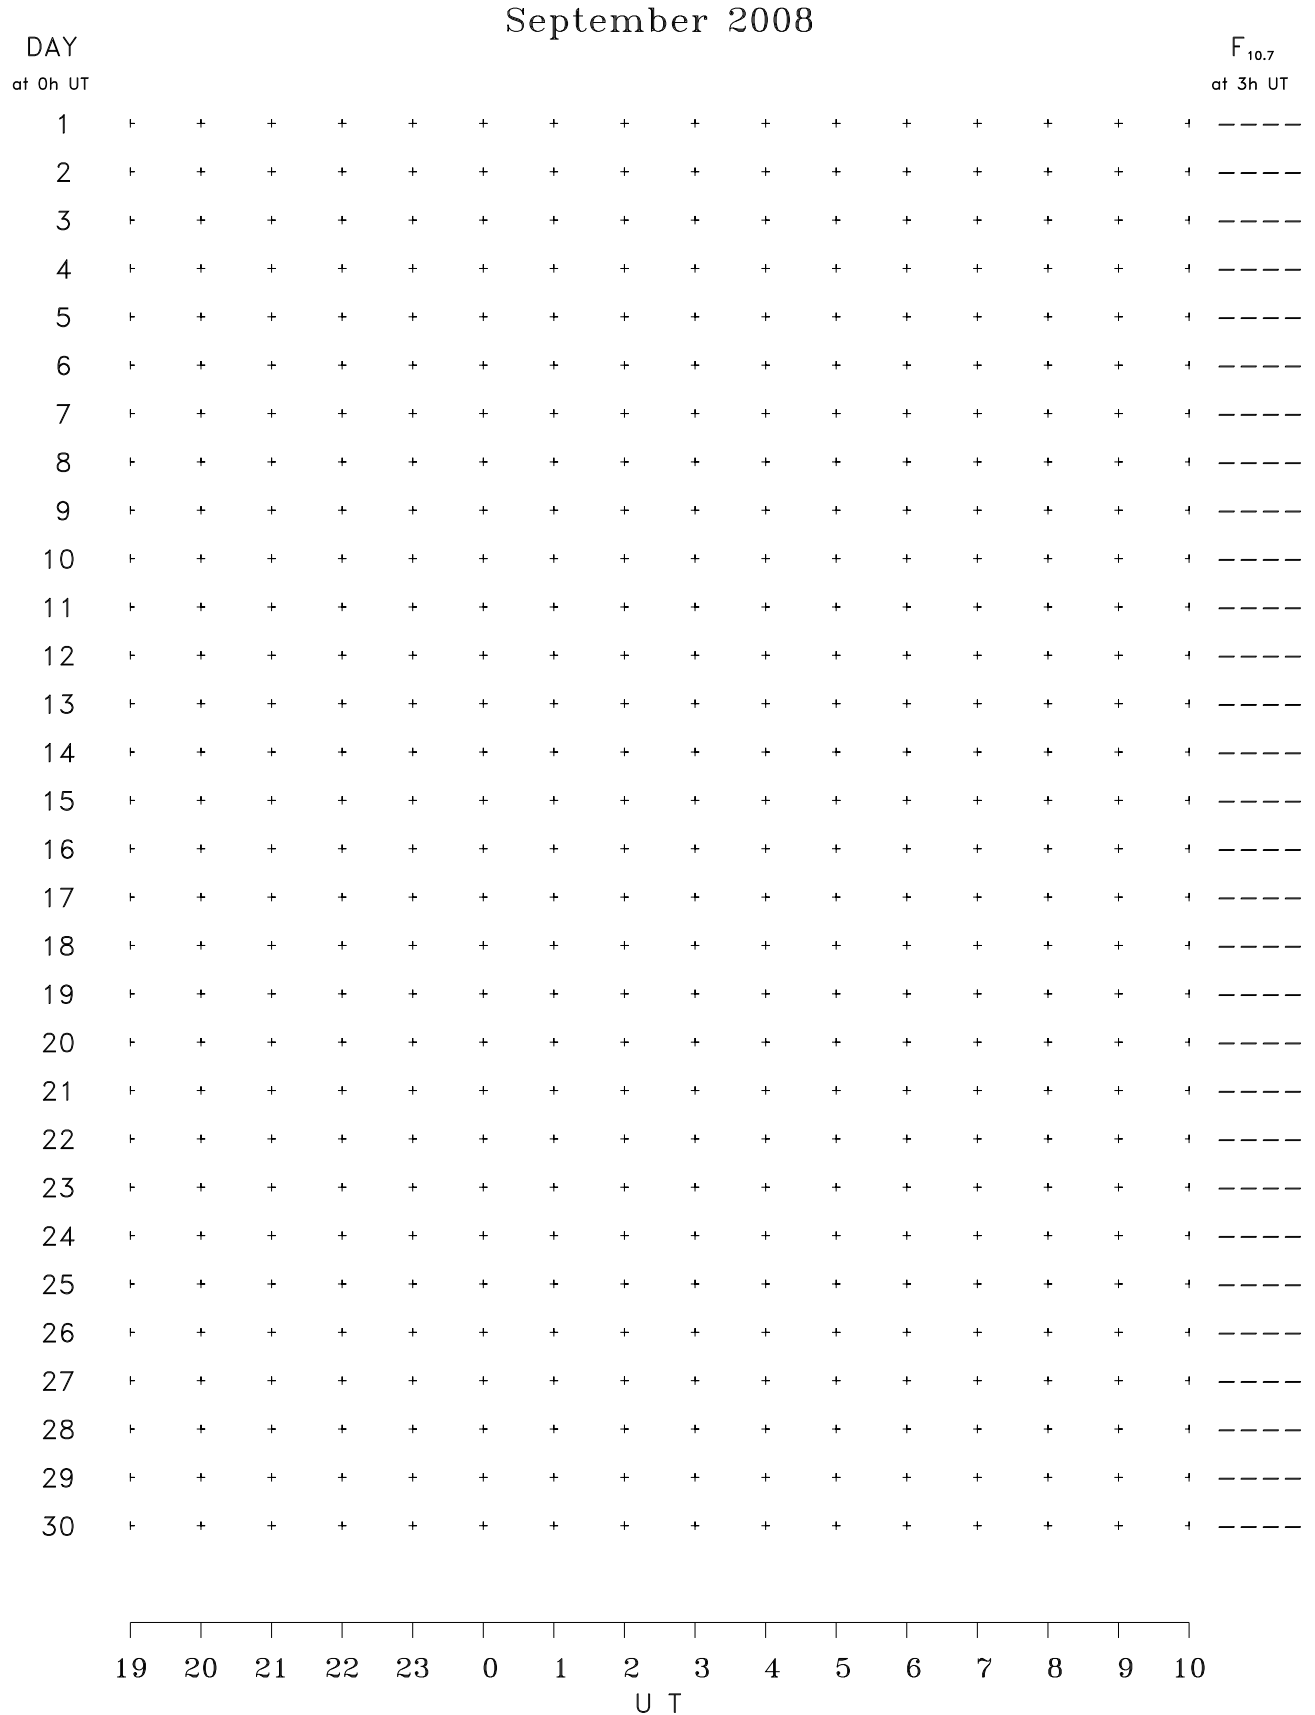

Hiraiso

September 2008

Single-frequency observations								
Normal observing period: *** - *** U.T. (sunrise to sunset)								
SEP. 2008	FREQ. (MHz)	TYPE	START TIME (U.T.)	TIME OF MAXIMUM (U.T.)	DUR. (MIN.)	FLUX DENSITY ($10^{-22} \text{ W m}^{-2} \text{ Hz}^{-1}$)		POLARIZATION REMARKS
						PEAK	MEAN	
No data for the 2800MHz fixed-frequency observation are available due to system maintenance.								

B. Solar Radio Emission

B2. Summary Plots of $F_{10.7}$ at Hiraiso

Note: A vertical grid space corresponds to a 100 sfu.
Elevation angle range $\geq 6^\circ$.
